To: All 760 NPA Code Holders and Interested Industry Members (California)

Subject: Final Meeting Minutes

Attached are the final meeting minutes to the April 18, 2007 follow-up review meeting for the California 760 NPA. These minutes were reviewed and approved as final by the industry.

If you have any questions, please give me a call at (805) 520-1945 or via email at joe.cocke@neustar.biz.

Sincerely,

Joseph R. Cocke
Sr. NPA Relief Planner
NANPA

FOLLOWUP TO PUBLIC MEETINGS
FINAL MINUTES
April 18, 2007, 10:00 AM (PT)
VIA CONFERENCE CALL**

WELCOME, INTRODUCTIONS & AGENDA REVIEW

Mr. Joe Cocke, NeuStar NANPA Senior NPA Relief Planner opened the meeting with introductions, a review of the agenda, the objectives of the meeting and NANPA's roles and responsibilities. A list of the attendees can be found in Attachment # 1.

CONSENSUS PROCESS AND NPA RELIEF PLANNING GUIDELINES

Joe stated the ATIS (Alliance for Telecommunications Industry Solutions) approved industry consensus process would be followed. He read highlights of the consensus process and explained how consensus is determined. In addition Joe stated that issues or positions could be expressed in the form of a Statement for the Record (in writing) and they could be conveyed at any point during the meetings. Silence will be considered agreement with a proposal, based on those on the call at the time for which consensus is called.

PURPOSE OF MEETING

This meeting on April 18, 2007 was originally to review and approve the minutes from the March 14, 2007 meeting as well as approve the draft petition. But because industry members received additional public input information from the CPUC on March 22, 2007 as well as the draft petition on March 23 Joe stated he would record an additional set of minutes.

STATUS OF CALIFORNIA 760 NPA

Joe stated that as of April 18, 2007, there are 726 codes assigned, 18 Unassignable codes and 44 codes available for assignment in the lottery plus 12 codes set aside for the Pooling Administration for a total of 56 codes remaining for assignment in this NPA. Joe informed the participants that the current October 2006 NRUF forecast projects the 760 to exhaust in 3Q2009 (he mentioned this forecast is not expected to change with the next publication of the April 2007 NRUF forecast). Cecilia Louie of Pooling Implementation provided an update on the pooling statistics: in the last 12 months 456 blocks and 21 codes were assigned – 16 for pool replenishment and 5 for LRNs; as of April 16 there are 1016 blocks available. Cecilia stated that for the next twelve months pooling forecasts the need for eight codes for pool replenishment.

REVIEW OF THE MARCH 14 MEETING MINUTES

The minutes were reviewed and approved with one minor addition.

REVIEW OF THE PUBLIC INPUT

Joe reviewed the CPUC Staff's summary of the input from the public meetings. Joe stated the CPUC provided additional detailed information on March 21, 2007 which restated the total numbers for the different preferences. The detailed information included internet responses and the written comments from the public.

The staff's restated summary of the public input from all mediums is as follows:

Split Plan #1	601
Split Plan #4	163
Overlay	261
Split # 1 or Overlay	3
Undecided	84
No Preference	186
TSO	7
Hexadecimal	<u>1</u>
TOTAL	1306

STATEMENTS FOR THE RECORD:

There were additional service providers that provided statements for the record:

1. Statement from Lorraine Kocen of Verizon:

“Verizon California Inc. supports an overlay as the superior form of area code relief for the 760 area code for the following reasons:

- 1) customers won't have to change their numbers - an overwhelming concern of customers in the public meetings.*
- 2) A split creates "haves" and "have nots" – some customers get to keep their numbers while others are forced to change and incur the associated costs and inconvenience.*
- 3) Overlays preserve local municipality boundaries while splits divide regions along area code boundary lines, fragmenting local communities of interest.*
- 4) future relief is transparent to customers - an additional area code can be added without any customer impact*
- 5) The overlay is non-discriminatory and competitively neutral both for telecommunications providers and for business customers who compete with one another. The overlay treats all customers equitably by not forcing some customers to incur expenses from which others are exempt.”*

AT&T concurred with the Verizon statement.

2. Statement from Sandra Gore of COX Communications

“Cox is not supportive of an overlay and Cox is supportive of a split if the 760 remains on the western edge.”

REVIEW OF DRAFT PETITION

The industry members reviewed the draft petition and provided several changes to the event descriptions in the implementation schedule charts on page 10 to clarify the events of customer education and network preparation. Staff also suggested the industry include its customer education program with the filing as a separate exhibit. Attached to these minutes is a copy of the 760 PEP milestones provided to NANPA by several industry members.

REVIEW OF TODAY'S DRAFT MEETING MINUTES

Joe stated he would have today's draft minutes and updated draft petition on NNS in the next two weeks – no later than May 2, 2007, the industry agreed to an additional meeting on May 16, 2007 at 10 am (PT), to review and approve the minutes and the petition. These minutes became final on May 16, 2007.

There were no further discussion items and the meeting was adjourned.
